Test card details

Below are details of test card data that can be used when integrating with the gateway.

Please note that ONLY these card details will work in test mode - real card numbers will NOT work.

Test case	Card Result	Card enrolled in 3d Secure	Description
1	Authorised	No	This test case is for cards that are not 3D Secure enrolled & will be authorised (although they still might be declined by AVS/CV2 checks)
2	Declined	No	This test case is for cards that are not 3D Secure enrolled & will always result in the authorisation being declined (even if the AVS/CV2 checks pass)
3	Referred	No	This test case is for cards that are not 3D Secure enrolled & will always result in the authorisation being referred (even if the AVS/CV2 checks pass)
4	Authorised	Yes	This test case is for cards that are 3D Secure enrolled & will be authorised (although they still might be declined by AVS/CV2 checks or if the 3D Secure password is incorrect)
5	Declined	Yes	This test case is for cards that are not 3D Secure enrolled & will always result in the authorisation being declined (even if the AVS/CV2 or 3D Secure checks pass)
6	Referred	Yes	This test case is for cards that are not 3D Secure enrolled & will always result in the authorisation being referred (even if the AVS/CV2 or 3D Secure checks pass)

*This is the just result of the authorisation phase - the ultimate result of whether the transaction is accepted or declined can still be influenced by the CV2, Address data or the 3D Secure result that is submitted with the transaction - e.g. for test case 1 (based on your account's AVS/CV2 policies), the transaction can still be declined if an incorrect CV2 is submitted, and for test case 4, a decline can still be achieved if the 3D Secure result is set to failed in the ACS simulator.

Card abbreviation key for test cases

Card abbreviation	Card type
VC	Visa
VD	Visa Debit (Delta)
MA	Maestro
MC	MasterCard
EL	Visa Electron
VP	Visa Purchasing (corporate)
AM	American Express
JCB	JCB

Test Case 1 (Authorisation Successful with no 3D Secure):

Card Type	Card Name	Card Number	Expiry Date	Start Date	CV2	Address
